Jump, Dance, Move and Groove

Kindertots enrolling NOW!!!!

Boys and girls, 2 years of age, enjoy an engaging, music and movement-filled curriculum that brings preschool educational concepts to life. Our program is uniquely based on the early childhood educational science of physical, creative and cognitive development.

Kindertots uses colorful props and familiar nursery rhymes set to music in order to inspire movement, teach and have fun. Children develop their gross motor skills, movement creativity, physical development (flexibility, strength, balance, coordination), body awareness, and communication skills, while learning numbers, shapes, colors and songs.

We look forward to moving and grooving with your child in our positive, caring classes, as they reach new levels of self-esteem and physical and mental confidence.
